ULTIMATE FRAGMENT

TECHNOLOGY BENCHMARK

The innovative **ULTIMATE FRAGMENT** technology outperforms conventional forging production techniques both from a financial and efficiency perspective significantly.

- **Reduced required construction time**
- **Lower initial investment**
- **Strikingly decreased floor space requirements**
- **Minimized time to first piece produced**
- **Quick scalability of production outputs**
- **Decentralizable production setup**
- **Production mobility through modular plants**
- **Dynamically adaptable production program**
- **Decoupled handling of explosives and shell body**
- **Sufficiency of common job skills for production workers**
